

RELIABLE **BIOGAS** SOLUTIONS WORLDWIDE

Bio-Desulfurization system, removal of H_2S from raw biogas

The key to efficient and successful utilization of biogas.

The removal rate can reach more than 99%

No need for pretreatment of the raw biogas.

No need for high pressure of the raw biogas.

No need to add expensive agents.

High efficiency, low operating costs.

Environmentally friendly, there is not secondary pollutants.

It has strong adaptability and stability, and is suitable for biogas produced by different raw materials.

High security, high degree self-control.
