

RELIABLE **BIOGAS** SOLUTIONS WORLDWIDE

Assembled Tank + High efficiency low RPM agitators

High Load Anaerobic Reactor

Anaerobic Digestion (AD) at high concentration and high load, TS in the digester reach to 15%.

Enamel assembled tank, strong corrosion resistance, rapid installation, quality control, shorten the project construction period and lower labor costs.

Low speed mixer, suitable for high concentration fermentation system, reduce operating expenses.

Increase volume biogas production rate and save project investment.

Low heat consumption.
